### Search Notes

Your queries have completed processing. You may access an electronic version via eDAN (SCORE) and /or <http://es/ScoreAccessWeb>. If the result files have been separated into two (2) or more versions, you may view additional files via the "[View version list for this application](#)" link.

#### Protein Sequence Searches -- February 2005

All of the sequence databases on ABSS have recently been updated.

- Please note that the curators of the UniProt database have purged some temporary accession numbers from the most recent version of UniProt. These sequences have been assigned new permanent accession numbers. The new UniProt record may not contain the previous temporary accession number.
- If you encounter an accession number from an older search run against UniProt (results file extension **.rup**) that can no longer be found in the database, the permanent record with the new accession number can be found by searching the old accession number in the UniProt Protein Archive database (uniPARC) at:

<http://www.pir.uniprot.org/database/archive.shtml>

If you have any questions regarding this information or your results, please contact any STIC searcher.

#### Published Applications Database - November 2005

Published\_Applications Nucleic Acid and Published\_Applications Amino Acid database searches now generate two sets of results each. The Published\_Applications databases have been split into two parts to reduce the amount of time required for their daily updates. This results in more machine time being available for processing searches.

Newly published applications will appear in the Published\_Applications\_New databases; older published applications make up the Published\_Applications\_Main databases.

Searches run against Nucleic Acid Published\_Applications produce two sets of results, with the extensions **.rnpbm** (Published\_Applications\_NA\_Main) and **.rnpbn** (Published\_Applications\_NA\_New).

Searches run against Amino Acid Published\_Applications produce two sets of results, with the extensions **.rapbm** (Published\_Applications\_AA\_Main) and **.rapbn** (Published\_Applications\_AA\_New).

## STIC-Biotech/ChemLib

From: Devi, Sarvamangala  
 Sent: Thursday, August 17, 2006 7:37 AM  
 To: CRFE STIC-Biotech/ChemLib  
 Cc: Shears, Beverly  
 Subject: 09/830,026

Please ask Ms. Beverly Shears to perform this search.

In application 09/830,026, please perform a sequence search for SEQ ID NO: 2 in commercial and pending application databases. Please provide a paper copy of the first 40 hits.

Please include an inventors' name search for William D. Picking, Wendyl L. Picking and Edwin V. Oaks.

Please perform a text search for: 'Recombinant invasin protein'. Examples IpaC, IpaD, IpaB and SipC.

Thanx.

S. DEVI, Ph.D.  
 Primary Examiner
